Continuing Education Course #140
Campgrounds
The Basics of Design

1. What provides a campground the means to increasing its revenue without a large monetary investment?
 - a. Paved roads
 - b. Sanitary sewer systems
 - c. Hiking trails
 - d. Primitive campsites
2. A Self-Contained Unit has what features?
 - a. A flushable toilet
 - b. Internal potable water storage tanks
 - c. Internal sewage storage tanks
 - d. All of the above
3. True or False: You should never rely on regulatory reviewers to catch the design flaws in your plans.
 - a. True
 - b. False
4. The bathhouse service area is defined by the _____.
 - a. The design engineer
 - b. The local regulatory agency
 - c. The Department of Interior
 - d. None of the above
5. True or False: Sanitary dump stations are typically required for all campgrounds that serve RVs.
 - a. True
 - b. False
6. A sanitary dump station will generally include _____?
 - a. A sloped apron
 - b. A water supply
 - c. A sign stating "Water not safe for drinking"
 - d. All of the above
7. Which primitive campsites will have a greater negative impact to the environment?
 - a. Designated
 - b. Non-designated
 - c. Neither
8. What is the typical size of a tent camping site?

- a. 12-ft by 30-ft in size with a 12-ft by 12-ft camp pad
- b. 12-ft by 30-ft in size with a 20-ft by 20-ft camp pad
- c. 20-ft by 30-ft in size with a 20-ft by 20-ft camp pad
- d. 24-ft by 40-ft in size with a 24-ft by 20-ft camp pad

9. What electrical service is typically supplied to a tent camping site?

- a. 110-volt 20-amp
- b. 110-volt 30-amp
- c. 110-volt 50-amp
- d. None of the above

10. Where are the water, sewer, and electrical connections found on a RV?

- a. Near the front of the vehicle on the driver's side
- b. Near the rear of the vehicle on the driver's side
- c. Near the front of the vehicle on the passenger's side
- d. Near the rear of the vehicle on the passenger's side

11. What is the preferred RV campsite size?

- a. approximately 12-ft by 30-ft in size with an adjacent 20-ft by 20-ft camp pad
- b. approximately 20-ft by 30-ft in size with an adjacent 20-ft by 20-ft camp pad
- c. approximately 12-ft by 50-ft in size with an adjacent 20-ft by 20-ft camp pad
- d. approximately 20-ft by 50-ft in size with an adjacent 20-ft by 20-ft camp pad

12. What is the maximum elevation difference of the four corners of a RV parking pad?

- a. 4 inches of elevation difference or 6-8 inches in extreme cases
- b. 6 inches of elevation difference or 8-10 inches in extreme cases
- c. 8 inches of elevation difference or 10-12 inches in extreme cases
- d. 10 inches of elevation difference or 12-14 inches in extreme cases

13. Most RV jack levelers will not lift a tire completely off the ground?

- a. True
- b. False

14. What size electrical service is typically supplied at a RV site?

- a. 20-amp
- b. 30-amp
- c. 50-amp
- d. All of the above.

15. What is the preferred design choice for campground drives?

- a. One-way roads
- b. Two-way roads
- c. One-way roads with pedestrian lanes
- d. None of the above.

16. What is the posted speed limit in most campgrounds?

- a. 5 or 10 mph
- b. 10 or 15 mph
- c. 15 or 20 mph
- d. 20 or 25 mph

17. Which of the following is true for curved campsites?
- a. They should only be used on one-way drives
 - b. They should only be used on the left side of the road
 - c. They should never curve to the right
 - d. All of the above
18. Which of the following is NOT true for one-way drives in campgrounds?
- a. They provide quick easy access to campsites
 - b. They require more maneuvering room to get into the campsite
 - c. They minimize congestion on the drives by drivers not blocking two lanes of traffic when backing into campsites
 - d. They increase safety for drivers and pedestrians by limiting traffic flow to a single direction
19. The radius on a curved campsite should not be less than a _____?
- a. 25-foot radius
 - b. 50-foot radius
 - c. 80-foot radius
 - d. 100-foot radius
20. The most common pull-thru campsite is the _____ loop pull-thru.
- a. Inside
 - b. Outside
21. What is the recommended RV pad width?
- a. 12 feet
 - b. 14 feet
 - c. 20 feet
 - d. 24 feet
22. Which traffic calming design method should be avoided in campgrounds?
- a. Curves in the road
 - b. Stop signs
 - c. Speed bumps
 - d. Posted speed limits
23. Boardwalk guard railings should have slat spacing no greater than ___ inches in width?
- a. 2
 - b. 4
 - c. 6
 - d. 8
24. True or False: ADA campsites should be located as close as possible to an ADA bathhouse.
- a. True
 - b. False
25. True or False: Campgrounds are never required to provide street names if the campsite numbers are posted.
- a. True
 - b. False
